Personal Profile

I started out as an apprentice at Bryant homes now Taylor Wimpey and have since gone on to work in various areas from houses, schools, high rise flats and commercial units. I worked in as many different areas as possible to gain experience and be the best bricklayer. I wish to further my career on the books at a reputable company. My career aim is to build new projects to the highest quality for any reputable employer located mostly in west Yorkshire. It is a matter of principle to me to always go above and beyond being the last man on site, dedicating myself to my work.
